## **Mark Scheme for November 2020**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

**Annotations**

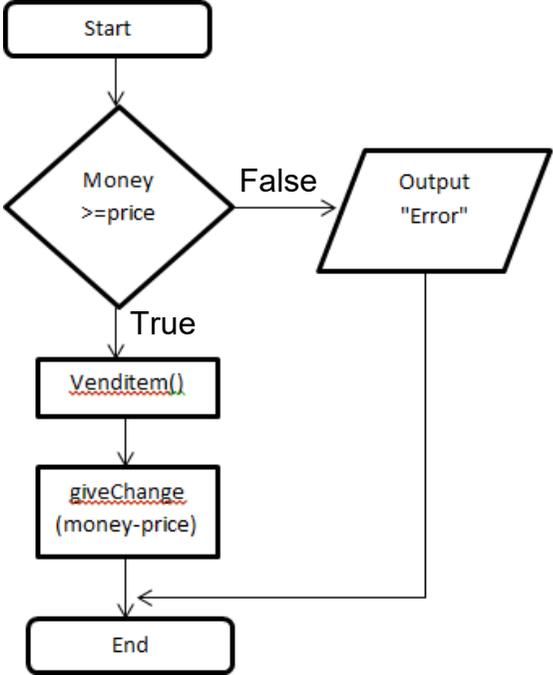

<b>Annotation</b>	<b>Meaning</b>
<b>SEEN</b>	Answer seen – this annotation <b>must</b> be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
	Omission mark
	Benefit of doubt
	Cross
	Follow through
	Not answered question
	Benefit of doubt not given
	Repeat
	Tick

Each question must include annotation. All marks credited on point-based marking must be given a tick.

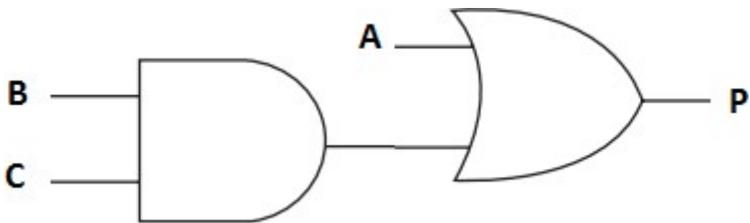

Question		Answer	Mark	Guidance															
1	(a)	1 mark for each letter <table border="1"> <tr> <td>Decomposition</td> <td>D</td> </tr> <tr> <td>Abstraction</td> <td>B</td> </tr> <tr> <td>Input Sanitisation</td> <td>A</td> </tr> <tr> <td>Casting</td> <td>F</td> </tr> </table>	Decomposition	D	Abstraction	B	Input Sanitisation	A	Casting	F	4 AO1 1a(4)	Accept answers that write the definition instead of the letter.							
Decomposition	D																		
Abstraction	B																		
Input Sanitisation	A																		
Casting	F																		
1	(b)	(i) <ul style="list-style-type: none"> <li><code>timer = 7.3</code></li> </ul>	1 AO3 2b(1)	Ignore dim / define / etc and data types Do not allow use of string delimiters or other unsuitable data types. Allow other suitable assignment symbols (e.g. := ) Do not allow == for assignment. Do not penalise case. Spelling must be accurate															
1	(b)	(ii) <ul style="list-style-type: none"> <li>Real // Float</li> </ul>	1 AO2 1b(1)	Allow decimal, single, double or equivalent															
2	(a)	<table border="1"> <thead> <tr> <th>Line</th> <th>Program code</th> <th>Output</th> </tr> </thead> <tbody> <tr> <td>08</td> <td><code>print score</code></td> <td><b>18</b></td> </tr> <tr> <td>09</td> <td><code>print "name"</code></td> <td><b>name</b></td> </tr> <tr> <td>10</td> <td><code>print newscore(score,2)</code></td> <td><b>37</b></td> </tr> <tr> <td>11</td> <td><code>print score</code></td> <td><b>18</b></td> </tr> </tbody> </table>	Line	Program code	Output	08	<code>print score</code>	<b>18</b>	09	<code>print "name"</code>	<b>name</b>	10	<code>print newscore(score,2)</code>	<b>37</b>	11	<code>print score</code>	<b>18</b>	4 AO2 1b(4)	
Line	Program code	Output																	
08	<code>print score</code>	<b>18</b>																	
09	<code>print "name"</code>	<b>name</b>																	
10	<code>print newscore(score,2)</code>	<b>37</b>																	
11	<code>print score</code>	<b>18</b>																	

2	(b)	<p>1 mark per bullet to max 2</p> <ul style="list-style-type: none"> <li>• <b>Easier/quicker</b> for humans to <b>write</b></li> <li>• <b>Easier/quicker</b> to <b>read / understand / remember</b></li> <li>• <b>Easier/quicker</b> to <b>maintain / debug / spot errors</b></li> <li>• ...because code is closer to English / uses English words</li> <li>• Less code to write</li> <li>• ...because one HLL instruction represents many assembly instructions</li> <li>• Portable (between processors) // will work with different types of computer</li> </ul>	2 AO1 1b(2)	<p>Accept “human language” as English for BP4</p> <p>“Easier to use” is too vague.</p>
2	(c)	<p>1 mark per bullet to max 2</p> <ul style="list-style-type: none"> <li>• Each character (in character set) has a <b>unique</b> (binary) number/value</li> <li>• Each character in the <b>string</b> is assigned its associated number/value</li> <li>• The (binary) value of each character is stored/combined (in order)</li> <li>• ... by example e.g. The binary value for D, then for r, then for u</li> <li>• Uses ASCII/Extended ASCII/Unicode</li> </ul>	2 AO2 1a(2)	

Question			Answer	Mark	Guidance															
3	(a)	(i)	1 mark per bullet to max 2 e.g. <ul style="list-style-type: none"> <li>• Check the program meets the <b>user requirements</b></li> <li>• Check the program works (as intended) // detect logic / syntax errors</li> <li>• Check the program does not crash (under invalid entry) // check error messages are suitable</li> <li>• ...allow these errors to be fixed</li> <li>• ...make sure there are no problems when released</li> <li>• Any suitable example <b>related to the vending machine</b> e.g. gives correct change</li> </ul>	2  AO1 1b(2)	Allow two any suitable examples for two marks  BOD “find errors”, “find bugs” for BP2  “fix errors” by itself is one mark (BP4)															
3	(a)	(ii)	1 mark per bullet to max 2 <ul style="list-style-type: none"> <li>• Iterative is during development // repeatedly testing <u>after/while making changes</u></li> <li>• Final is when the development is (almost) complete // done after iterative testing</li> </ul>	2  AO1 1b(2)	Do not accept just “repeatedly testing” for iterative  BOD “iterative testing tests modules/sections”															
3	(a)	(iii)	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Code entered</th> <th style="width: 33%;">Money inserted</th> <th style="width: 33%;">Expected result</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> <td> </td> </tr> <tr> <td style="text-align: center;"><b>C2</b></td> <td> </td> <td> </td> </tr> <tr> <td> </td> <td style="text-align: center;"><b>£0.49</b> (or any value less than £0.50)</td> <td> </td> </tr> <tr> <td> </td> <td> </td> <td style="text-align: center;"><b>Invalid Selection</b> (or any suitable error message)</td> </tr> </tbody> </table>	Code entered	Money inserted	Expected result				<b>C2</b>				<b>£0.49</b> (or any value less than £0.50)				<b>Invalid Selection</b> (or any suitable error message)	3  AO3 2b(3)	For £0.49 accept any value <£0.50. Must be a specific value, not a description.  Accept any suitable error message for invalid selection
Code entered	Money inserted	Expected result																		
<b>C2</b>																				
	<b>£0.49</b> (or any value less than £0.50)																			
		<b>Invalid Selection</b> (or any suitable error message)																		

3	(b)	(i)	<ul style="list-style-type: none"> <li>money</li> <li>price</li> </ul>	1 AO1 1b(1)	Must be an identifier, not description. Ignore case.
3	(b)	(ii)	<ul style="list-style-type: none"> <li>one</li> </ul>	1 AO2 1b(1)	
3	(c)		<p>1 mark per bullet</p> <ul style="list-style-type: none"> <li>Checking if <code>money &gt;= price</code>...</li> <li>...decision (diamond shape) used</li> <li>...<code>venditem()</code> and <code>giveChange(money-price)</code> <u>if True/Yes</u></li> <li>...output an error if <u>False / No</u></li> <li>Terminator used to start and end the program and all paths terminated</li> </ul>	5 AO3 2b(5)	<p>Reasonable attempt at BP1 needed for credit BP2, 3 and 4</p> <p>Ignore other additional code.</p> <p>BP3 and BP4 must follow on from True/False // Yes/No decision to be credited.</p> <p>Subroutines names and parameters must be correct. Ignore missing brackets on <code>venditem</code>.</p>  <pre> graph TD     Start([Start]) --&gt; Decision{Money &gt;= price}     Decision -- True --&gt; Venditem[Venditem()]     Venditem --&gt; GiveChange[giveChange(money-price)]     GiveChange --&gt; End([End])     Decision -- False --&gt; Output[/Output "Error"/]     Output --&gt; End     </pre>

Question			Answer	Mark	Guidance
3	d	i	1 mark per bullet to max 2 <ul style="list-style-type: none"> <li>• Indentation // whitespace</li> <li>• Appropriately named variables / identifiers</li> <li>• Modularisation / use of subroutines</li> </ul>	2  AO2 1b(2)	
3	d	ii	<ul style="list-style-type: none"> <li>• Comments</li> <li>• Use of constants</li> </ul>	1  AO2 1b(1)	
3	e		<ul style="list-style-type: none"> <li>• <code>SELECT ItemCode // *</code></li> <li>• <code>FROM ITEMS</code></li> <li>• <code>WHERE</code></li> <li>• <code>...Stock &lt; 10</code></li> </ul>	4  AO3 2b(4)	Accept other fields shown in addition to <code>ItemCode</code>  Accept <code>Stock &lt;=9 / etc.</code>  Ignore case. Spelling of fields and table must be correct.  If <code>WHERE</code> missing, <code>Stock &lt; 10</code> must be after <code>FROM</code> clause.
3	f		1 mark per bullet <ul style="list-style-type: none"> <li>• Input from user</li> <li>• Check IF input value is "on"...</li> <li>• ... if so, assign 1 to <code>statevalue</code></li> <li>• Correct assignment of 2 for "off" and 3 for "suspended" with correct state and IF</li> <li>• Correct logical check (else) to output "invalid state" <u>if no state set</u></li> </ul>	5  AO3 2b(5)	Accept alternative error messages. Variable names must not include obvious spaces.  BP3 dependent on BP2. BP2 and BP4 must be a logical comparison using IF and not just the CASE statement. NE to simply replace CASE with IF.  Penalise each error once then apply FT.  e.g. <pre> newstate = input("Enter the new state : ") if newstate == "on" then     statevalue = 1 elseif newstate = "off" then     statevalue = 2 elseif newstate = "suspended"     statevalue = 3 else     print("Invalid state") endif           </pre>

4	(a)		<ul style="list-style-type: none"> <li>E 3</li> </ul>	2 AO1 1b(2)	1 mark per digit (mark right to left) Max 1 if any additional leading values
4	(b)		<ul style="list-style-type: none"> <li>0110 1001 <u>must be 8 bits</u></li> </ul>	2 AO1 1b(2)	1 mark per nibble (mark right to left). Max 1 if any additional leading values
4	(c)		<p>1 mark per bullet to max 2</p> <ul style="list-style-type: none"> <li>Easier/quicker to communicate / enter / write / read / remember</li> <li>Less chance of input errors // easier to spot errors</li> <li>They are smaller / shorter</li> <li>Easy to convert between binary and Hexadecimal</li> </ul>	2 AO1 1b(2)	<p>Mark response as a whole.</p> <p>Do not accept answers simply describing what hexadecimal is.</p> <p>“easier to understand” or “easier to use” on its own is NE</p> <p>BP3 (smaller) must refer to size when written down, NOT size when stored which is unaffected)</p>
4	(d)	(i)	<ul style="list-style-type: none"> <li>3</li> </ul>	1 AO1 1b(1)	CAO
4	(d)	(ii)	<ul style="list-style-type: none"> <li>1</li> </ul>	1 AO1 1b(1)	CAO
4	e		<ul style="list-style-type: none"> <li>00001111</li> </ul>	1 AO1 1b(1)	Ignore missing or additional leading zeros
4	f	i	<p>1 mark per bullet point</p> <ul style="list-style-type: none"> <li>B AND C</li> <li>OR gate with two inputs, one of which is A</li> <li>...correct connection of these two gates with no additional gates / connections</li> </ul>	3 AO1 1b(3)	<p>Shape must be accurate</p> 

<b>4</b>	<b>f</b>	ii	1 mark per bullet point <ul style="list-style-type: none"><li>• Correct completion of A and B inputs as <b>1 1</b></li><li>• 0 output for 01 input</li><li>• 0 output for 10 input</li><li>• 0 output for 11 input</li></ul>	4 AO1 1b(1) AO2 1b(3)	CAO <table border="1" data-bbox="1346 172 2024 517"><thead><tr><th data-bbox="1346 172 1570 236"><b>A</b></th><th data-bbox="1570 172 1783 236"><b>B</b></th><th data-bbox="1783 172 2024 236"><b>P</b></th></tr></thead><tbody><tr><td data-bbox="1346 236 1570 308"><b>0</b></td><td data-bbox="1570 236 1783 308"><b>0</b></td><td data-bbox="1783 236 2024 308"><b>1</b></td></tr><tr><td data-bbox="1346 308 1570 379"><b>0</b></td><td data-bbox="1570 308 1783 379"><b>1</b></td><td data-bbox="1783 308 2024 379"><b>0</b></td></tr><tr><td data-bbox="1346 379 1570 451"><b>1</b></td><td data-bbox="1570 379 1783 451"><b>0</b></td><td data-bbox="1783 379 2024 451"><b>0</b></td></tr><tr><td data-bbox="1346 451 1570 517"><b>1</b></td><td data-bbox="1570 451 1783 517"><b>1</b></td><td data-bbox="1783 451 2024 517"><b>0</b></td></tr></tbody></table>	<b>A</b>	<b>B</b>	<b>P</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>0</b>	<b>1</b>	<b>0</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>	<b>1</b>	<b>0</b>
